PROFESSIONAL EXPERIENCE

Software Engineer | Sterling One Technologies May 2026 – Present

Remote

- Led backend development as the **sole backend developer** for a **Wealth Management System** on Frappe Framework and ERPNext, owning backend architecture, database design, and business logic.
- Engineered custom **Frappe DocTypes**, server scripts, and **REST APIs** to manage investment assets and transactions.
- Created complex backend functionality covering transaction processing, data tracking, **portfolio valuation**, and value history.
- Developed ERPNext-based frontend applications using **Next.js**, integrating components with backend APIs.
- Engineering a cross-platform **mobile application** using **React Native, Expo, and TypeScript**, integrated with the Frappe ERPNext backend.

PROJECTS

Easy Apply – Job Portal Next.js, Node.js, Express.js, PostgreSQL, Redis, Socket.IO, Razorpay

- Built a **full-stack job portal** connecting recruiters with job seekers, supporting job postings and application tracking.
- Implemented real-time chat and live updates with **Socket.IO and Redis Pub/Sub**, enabling horizontal scaling across multiple server instances.
- Integrated **Razorpay** to support subscription plans and recurring payments.
- Designed secure APIs with **JWT authentication** and role-based access control.
- Optimized API response time by **70–95%** using Redis caching, reducing database load.

Project Manager MongoDB, Express.js, React.js, Node.js, Jest

- Developed a **full-stack MERN application** with JWT authentication and authorization securing all CRUD operations.
- Enabled users to organize work by creating, updating, and deleting tasks.
- Authored Jest test suites achieving **~90% coverage** of API endpoints, improving backend maintainability.

Real-time Chat App Node.js, Express.js, Socket.IO

- Created a room-based chat application with live message delivery, active user lists, and unique username enforcement.
